📍 92-94 Av. Gén. Leclerc

54000 Nancy

🌐 International mobility

🚗 Driver's License (B)

🌐 LinkedIn Profile

LANGUAGES

French — Bilingual

English — C1/C2 (Cambridge Grade B: 199)

Arabic — Native

German — B1 (Goethe-Institut)

SKILLS

- Python (Pandas, Scikit-Learn)
- Deep Learning (PyTorch)
- Statistical Modeling
- SQL & Databases
- Operations Research & Optimization
- Git / GitHub
- Streamlit (Web Apps)

SOFT SKILLS

- Autonomy
- Curiosity: strong desire to learn
- Analytical & synthesis skills
- Leadership & project management
- Problem-solving

INTERESTS

Oil painting (portraits), astrophysics, horseback riding (endurance), culinary discoveries, Greek mythology.

End-of-Studies Internship Application — 6 months DATA SCIENCE & MACHINE LEARNING STATISTICAL MODELING

Engineering Student, Mines Nancy — 3rd year, Applied Mathematics

Available from February 15, 2027

EDUCATION

- **Diplôme Ingénieur Civil des Mines (MSc in Engineering)** 2024 – 2027
Mines Nancy (ENSMN)
 - Major IM DMO — Applied Mathematics, Data Science and Stochastic Modeling.
 - Core courses: stochastic and statistical modeling, advanced deep learning, reinforcement learning, Bayesian Inference, scalable architectures (*some courses taken jointly with M2 IMSD*).
- **Intensive Engineering Preparatory Classes (PCSI – PSI*)** 2022 – 2024
Lycée du Parc, Lyon

PROFESSIONAL EXPERIENCE

- **R&D Data Analyst — Internship** June – August 2026
Saint-Gobain ISOVER — CRIR (R&D), Rantigny
 - **Data pipeline automation (Python):** extraction, cleaning, and consolidation of factories' energy consumption data.
 - **Interactive web application (Streamlit):** cross-factory energy benchmark, automated KPIs, and deployed dashboards.
 - **Time series:** feasibility study on modeling and forecasting the energy consumption of production lines.

SCIENTIFIC PROJECTS

- **Polysomnography & AI (University Hospital Project)** 2026 – 2027
3rd-year Scientific Project — Mines Nancy, with the University Hospital
 - Extension of an automatic sleep cycle identification prototype by integrating complementary physiological measurements.
 - Signal processing and machine learning to refine sleep phase detection and identify other anomalies.
- **Image Captioning — Deep Learning** 2026
 - CNN encoder (feature extraction) coupled with an RNN decoder for caption generation, using PyTorch.
- **SIR Epidemiological Modeling** 2026
 - Delay model in population dynamics
 - parameter evaluation via numerical optimization and machine learning.
- **Industrial Project — Saint-Gobain ADFORS** 2025 – 2026
 - Conducted a comprehensive bibliographic study and engaged with potential industrial partners to assess polymer waste recovery solutions.

LEADERSHIP & INVOLVEMENT

- **Vice-President — Est-Horizon Forum** 2025 – 2026
 - Managed a **€120,000** budget and a team of **25 students**; organized a career fair gathering 50 companies and 600 attendees.
